## MATERIALE RICICLATO E FIBRA DI VETRO

### Sostenibilità e Resistenza nei Nostri Prodotti

I nostri articoli vengono realizzati con un'attenzione particolare alla sostenibilità e alla qualità dei materiali. Utilizziamo materiale plastico riciclato, contribuendo così a ridurre l'impatto ambientale e a promuovere un'economia circolare.

In alcuni modelli selezionati, il materiale riciclato viene rinforzato con fibra di vetro, una componente che migliora la resistenza meccanica, la durabilità e la stabilità dimensionale del prodotto. Questo tipo di composizione è particolarmente indicato per articoli destinati a un uso intensivo o per ambienti esterni, dove sono richieste prestazioni superiori.

Altri articoli, invece, vengono realizzati senza l'aggiunta di fibra di vetro, ma sempre con plastica riciclata di alta qualità, garantendo comunque un eccellente livello di robustezza e affidabilità, in linea con i nostri standard produttivi.

La scelta tra le due tipologie di composizione dipende dalla destinazione d'uso del prodotto e dal design tecnico specifico, mantenendo sempre un equilibrio tra sostenibilità, estetica e funzionalità.

## RECYCLED MATERIAL AND GLASS FIBER

### Sustainability and Strength in Our Products

Our items are manufactured with a strong focus on sustainability and material quality. We use recycled plastic material, helping to reduce environmental impact and support a circular economy.

In selected models, the recycled material is reinforced with glass fiber, which enhances the product's mechanical strength, durability, and dimensional stability. This composition is especially suitable for products intended for heavy use or outdoor environments, where higher performance is required.

Other items, on the other hand, are made without the addition of glass fiber, but still using high-quality recycled plastic, ensuring excellent robustness and reliability, in line with our production standards.

The choice between these two types of composition depends on the product's intended use and technical design, always maintaining a balance between sustainability, aesthetics, and functionality.

**Polipropilene | Polypropylene**

Il polipropilene (PP) è un polimero termoplastico, inventato circa 50 anni fa e in continua evoluzione, largamente impiegato nella produzione di numerosi oggetti, anche di uso quotidiano.

Da molti anni, anche IGAP S.p.A. / GRANDSOLEIL utilizza polimeri di altissima qualità per la produzione della propria linea di sedie e tavoli da giardino e per ambienti esterni, realizzando prodotti resistenti, pratici, leggeri e di facile manutenzione.

Negli ultimi anni, oltre al policarbonato, IGAP ha introdotto tecnopolimeri innovativi derivati dal polipropilene, registrati con i marchi HIGLOPP e HIGHMOPP, caratterizzati da superfici particolarmente brillanti e, nei modelli glossy, molto simili al policarbonato.

Sempre attenta alla ricerca di nuovi modelli e materiali per creare articoli esclusivi e di design, adatti a molteplici soluzioni di arredo sia per interni che per esterni, IGAP ha combinato il polipropilene con strutture in metallo cromato, dando vita a una linea di sedie eleganti e robuste, disponibili con diverse tipologie di telaio in metallo per soddisfare ogni esigenza della clientela.

Polypropylene (PP) is a thermoplastic polymer, invented about 50 years ago and continuously evolving, widely used in the production of numerous objects, including everyday items.

For many years, IGAP S.p.A. / GRANDSOLEIL has been using polymers of the highest quality to produce its line of garden chairs and tables for outdoor environments, creating products that are durable, practical, lightweight, and easy to maintain.

In recent years, in addition to polycarbonate, IGAP has introduced innovative technopolymers derived from polypropylene, registered under the brands HIGLOPP and HIGHMOPP, featuring particularly glossy surfaces that, in the glossy models, closely resemble polycarbonate.

Always attentive to the search for new models and materials to create exclusive and design-oriented products suitable for multiple furnishing solutions both indoors and outdoors, IGAP has combined polypropylene with chrome-plated metal frames, creating a line of elegant and sturdy chairs, available with different types of metal frames to meet every customer's needs.

Con diversi tipi di gambe | With different types of Legs

Polipropilene Highmopp (High Module Polipropilene): si tratta di Polipropilene speciale ad alto modulo che ha la stessa rigidità del Policarbonato. È quindi un Polipropilene lucido con la stessa portata e la stessa resistenza agli urti del Policarbonato. Anche l'aspetto esteriore è molto simile al Policarbonato. Solo il peso della sedia è inferiore in quanto il Polipropilene è un materiale più leggero.

Polypropylene Highmopp (High Module Polypropylene): this is a special glossy polypropylene which has the same rigidity and the same shock resistance as the polycarbonate. Even the outer appearance is very similar to polycarbonate. Only the weight of the chair is lower because the Polypropylene is a lighter material.
